

CONGRESS WILL
GATHER APRIL 7President Wilson Decides on
Extra Session Date.

CONFERS WITH UNDERWOOD

Democratic House Leader and Chief
Executive Agree That Tariff Shall
Be the Only Subject Given Consid-
eration—Banking and Currency
Changes Will Come Up at Regular
Session.Washington, March 13.—President
Wilson's proclamation assembling the
Sixty-third congress in special session
will fix April 7 as the date and sug-
gest that the revision of the tariff
should be the only subject given con-
sideration.These facts became known following
a conference between President Wil-
son and Representative Oscar W. Un-
derwood, the Democratic leader of the
house.It has been decided that action on a
measure proposing changes in the
banking and currency laws shall be
deferred until the regular session of
congress that will begin in December.
After consideration of all the facts
the president came to the conclusion
that it would be better to restrict the
work of the special session to the
tariff revision bills in order that they
might be placed on the statute books
at the earliest practicable date.It was pointed out to the president
that until uncertainty concerning the
tariff program of the Democrats has
been dissipated business in many lines
will to some extent be suspended.
The argument was made that con-
current action on the tariff and bank-
ing and currency laws would delay en-
actments in both instances, with a possi-
bility of a serious disturbance in
business.

Cabinet Approves Course.

The president will send first a mes-
sage pointing out the necessity for
tariff revision and will follow this
with a series of messages upon specific
things which he believes congress may
be able to act upon without unneces-
sarily prolonging the session. This
course is said to have been approved
at a cabinet meeting.It was originally the intention of
President Wilson to call congress to-
gether on or about April 1. At the
instance of Chairman Underwood and
his associates on the ways and means
committee it was decided that con-
gress should meet on April 7. The
change in date was made to give the
tariff makers of the house more time
to complete the revision bills.Although congress adjourned more
than a week ago the ways and means
committee has made little progress
on the measures. Of the sixteen bills
that will represent the proposed re-
vision work only two have been com-
pleted. In these cases the decisions
are tentative in the main, subject to
change when the bills come up for a
final reading in committee.The house leaders are elated over
the determination of the president to
co-operate with them in limiting the
business of the special session to the
tariff. In the first place it means
that congress will adjourn in a com-
paratively reasonable time.The Republicans will not filibuster
against the Democratic tariff bills.
They will register their protests in
given cases, making no effort to pre-
vent the dominant party from putting
through its program. In the second
place the president's decision means
that a complete organization of the
house may be put over until Decem-
ber.

RICH YOUNG MAN REFORMER

Assumes Task of Trying to Redeem
Bad Boys.Milwaukee, March 13.—Nell Wells
Norris, millionaire, young son of Mr.
and Mrs. Charles Norris of Milwau-
kee, has undertaken the task of re-
forming bad boys after every proba-
tion officer in the city has given up.Young Norris saved Alexander Ro-
manowicz a six-year term in the Wau-
kesha industrial school by promising
to take the boy in hand. The lad must
report to Mr. Norris three times a
week and from the \$9.50 a week he
earns must pay \$60 for property he
destroyed.Mr. Norris also took in charge Wal-
ter Pepper, a boy who continually
runs away from home and whose
father wants him disciplined.

DEATH PENALTY FOR PASTOR

Arkansas Minister Burned Three
Motherless Children to Death.Fort Smith, Ark., March 13.—Rev.
Marion Capps, a Methodist preacher,
was convicted and sentenced to death
by a jury in the circuit court here on
the charge of having burned to death
his three motherless children.Capps was charged with having tied
his five children to an oil soaked bed
to which he set fire. Two of the chil-
dren perished in the flames, while a
third died after escaping from the
house.A daughter, Bertha, fifteen years
old, and a son, Ellis, fifteen years
old, who recovered from their in-
juries, testified against their father.ASSERTS METHOD

Berlin Physician Describes How He
Discovered the Alleged Remedy and
the Precautions Taken to Render
It Perfectly Safe—Also Maintains
His Vaccine Acts as a Preventive.Ottawa, Ont., March 13.—Dr. Fried-
rich F. Friedmann of Berlin discussed
before the Canadian Association for
the Prevention of Tuberculosis his
treatment of tuberculosis, the manner
of its discovery and the precautions
he took to insure its harmlessness.He discarded human tuberculosis
bacilli, he said, after many experi-
ments because he feared the results
were too dangerous. The end of his
research came, he asserted, when he
found a bacillus which originated in a
cold blooded animal—the turtle—which
bacillus became non-virulent and atoxic
after frequent transplantation."When that condition was reached,"
he said, "I injected it into myself, then
into patients infected with tubercu-
losis, then into healthy children in tu-
bercular surroundings. I have found
the remedy invariably harmless."Discussing tests of his vaccine as a
preventive of tuberculosis Dr. Fried-
mann expressed the hope that this
would be found to be the great use of
his discovery in the future."I have found this remedy harmless
when I used it for patients ranging
from earliest childhood to the most
advanced age in all forms of applica-
tion—subcutaneous, intramuscular
and intravenous—even in big doses,"
Dr. Friedmann said, "and equally effi-
cient in all forms of tuberculosis—
pulmonary, bone, joint, glandular and
skin. Aside from hopeless cases,
whose fates were already sealed, the
remedy has proved its efficiency in
most instances.""I have vaccinated 350 children, vary-
ing in age from one hour to three
years. Most of these children were
living in tubercular environments and
much exposed to infection from the
source. The earliest immunizations
were made several months ago and all
the children are well today and are
free from all symptoms of scrofula or
tuberculosis."

FRIEDMANN WILL NOT TELL

Government Must First Recognize Im-
provement in Patients.Washington, March 13.—Govern-
ment tests of Dr. Friedmann's tuber-
culosis vaccine may be delayed in-
definitely by the refusal of the Berlin
physician to impart to the public
health service the method of making
vaccine from his cultures or the size
of the dose.It developed that Dr. Friedmann
has notified Surgeon General Blue
that he will not divulge his secret un-
til the government physicians have
recognized improvement in patients
treated by him.Surgeon General Blue announced
that under no circumstances would
the public health service administer
the vaccine to human beings at this
time, if at all.

STEEL SCHEDULE DRAFTED

Majority of House Committee De-
clines on Tentative Rates.Washington, March 13.—The Demo-
cratic task of preparing for tariff re-
vision advanced another stage when
the majority of the house ways and
means committee put the finishing
touches on the iron and steel sched-
ule after having previously disposed
of the two preceding schedules—A,
the chemicals; and B, the earthenware.
The members of the committee say
rates written into the schedule are
only tentative.It was learned that the extent to
which the house committees will be
named at the outset of the extra ses-
sion of congress will depend mainly
on the recommendation of the pres-
ident as to the scope of the legislation.

Illinois Executive Favors Meeting of
Governors.Springfield, Ill., March 13.—A con-
ference of governors and others inter-
ested in the suppression of vice and
the amelioration of the condition of
working girls promises to be one of
the early results of the investigation
started by the white slave committee
of the senate.In conference with Lieutenant Gov-
ernor O'Hara, Governor Dunne sug-
gested that such a conference would
be desirable. Lieutenant Governor
O'Hara will get into immediate com-
munication with the governors of
Michigan, Iowa, Missouri, Kentucky,
Wisconsin and Indiana, suggesting a
general conference in Springfield at
an early date.

PRISON HEAD FACES TRIAL

Sulzer Makes Allegations Against
Colonel Scott.Albany, N. Y., March 13.—Charges
of "nonfeasance and neglect of duty"
were preferred against Colonel Joseph
F. Scott, superintendent of state
prisons, by Governor Sulzer.The charges are based largely upon
the report submitted by the gov-
ernor's committee of inquiry. They
are based upon the allegations made
concerning the payment of \$25,000 to
Attorney Anshut by Harry K. Thaw
in an alleged bribery attempt involv-
ing Superintendent John W. Russell
of Matteawan.The specific charge also is made
that Colonel Scott intentionally tried
to defeat the demand of the governor
for the dismissal of Dr. Russell by
accepting his resignation over the
telephone.INSURGENT FORCES

out Firing a Shot.Douglas, Ariz., March 13.—Agua
Prieta fell to Constitutionalists sym-
patizers, who crossed the border
from Douglas. Not a shot was fired
and General Ojeda, commanding the
federal garrison, with about 500 men,
evacuated the town, leaving thirty
rural police to guard federal interests.After the surrender of the border
town 650 state troops, under Elias
Galles, arrived, and a provisional mu-
nicipal government was set up.Twenty-four of the guards left by
General Ojeda deserted to the rebel
standard and the six who refused to
join the Constitutionalists were ejected
from the town.Unarmed men from Douglas crossed
the border and reinforced the rebel
garrison. The new arrivals found 18,
000 rounds of ammunition, some rifles
and camp supplies left by the fed-
erals in their haste.Those in control of the border town
and port are celebrating the bloodless
victory. "Viva la constitution" is the
cry resounding through the streets of
the little Mexican town.

he had to give up his poolrooms,
Michels told District Attorney Whit-
man.Michels then went before the grand
jury to add his story to the evidence
that is being used as basis for indict-
ments of police officials and others.

eral politician backers of the system."Following the murder of Herman

secutor, contradicting the popular im-
pression that grafting was practiced

paid first \$50 monthly and then \$150.

SENATE COMMITTEES.

Washington, March 13.—
Work on the Democratic com-
mittee list of the senate was
not completed when the "steer-
ing" committee adjourned and
members expressed doubt as
to whether the reorganization
of the senate could take place
before Friday, if at that time.
The majority of the important
committee assignments had
been made.

Is Cue For Complaint.

TAFT'S DISCIPLES ACTIVE.

Friends of Ex-President and Others in
Party Which Held Power For Six-
teen Years Find It Hard to Give Up
Old Methods Without Making a Fuss.
Office Seekers Chagrined.

By ARTHUR W. DUNN.

Washington, March 13.—[Special.]—
President Wilson has given the critics
plenty to do. In fact, everything that
he has done which is different from
the actions of his predecessor has
given the friends of the former pres-
ident a cue to carp and complain. But
that is to be expected. It is rather
hard for a party which has been in
power sixteen years to give up with-
out making a fuss about it.Besides, President Taft gathered
about him quite a number of very de-
voted followers who became united in
their dislike of Roosevelt and their an-
tipathy to certain Democrats. These
are bound to be on hand with com-
plaints about the manner in which
things around the White House are
managed. Meanwhile it may be well
to keep in mind that Wilson is going
to be president for the next four years.

The Notice to Office Seekers.

Probably nothing caused quite so
much anguish as the decision of Pres-
ident Wilson that he would not see of-
fice seekers personally. Next to get-
ting an office it is the dearest joy of
an applicant to be able to have a heart
to heart talk with the president and
tell him what great work the aforesaid
office seeker put in for the man in the
seat of power. He, at least, has some-
thing to take home with him.Not since the days of Chester A. Ar-
thur has there been anything like the
turning of appointment of officers over
to cabinet members. That president
relied almost wholly upon his cabinet
to make the appointments, and they
were very successful. When Clevel-
and came into office he took personal
charge of nearly every appointment,
and his successors have done the same.
Cleveland also took over much of the
business theretofore transacted by the
departments, a practice his successors
have followed.

From Foreign Lands.

If Secretary Bryan should move all
the things in his Fairview home to his
residence in Washington every diplo-
mat representing a foreign country
would be able to see some very valu-
able work of art or bric-a-brac from his
home country, besides much that came
from regions not represented in the
diplomatic list. In his travels abroad
Mr. Bryan obtained many things of
value and interest, which adorn his
home in Nebraska.

Bourne Without Pay.

Although not a senator Bourne of
Oregon will continue to work as a sen-
ator and for the government, but with-
out pay. He is a member of two post-
al commissions, one in regard to rail-
way mail pay and second class mail
and the other regarding good roads,
but he would not allow provision to be
made for paying him a salary. Bourne
asserted that he would not consent to
be in the "lame duck" class, which
means getting a job when out of con-
gress.

Almost "Leave to Print."

Senator Owen of Oklahoma came
dangerously near trenching upon a
rule of the senate which does not allow
"leave to print" speeches inserted in
the Record. Along in the middle of
the night before adjournment he took
the floor to deliver a set speech, which
he had prepared several days before.
But he only "touched the high places,"
skipping like a senate reading clerk
when the senate considers an appropri-
ation bill.The senate prides itself upon the fact
that no "leave to print" speeches are
made in the body, thereby holding it-
self upon a higher plane than the
house, where much of the matter ap-
pearing as speeches is of the "leave to
print" kind.

Left Over Appropriations.

Had there been no extra session in
sight neither sundry civil bills nor the
Indian appropriation bill would have
passed. The former would have been
passed over the veto of the president
and the Indian bill would have been
compromised in some way. With the
ill feeling displayed at times in both
house and senate it is rather surpris-
ing that so many of the supply bills were
not defeated.It takes a man of nerve to talk a big
appropriation bill to death. Senator
Fall of New Mexico displayed that kind
of nerve on the Indian bill. He does
not want the Apaches returned to New
Mexico, for which the bill provides.

Underwood in Power.

Oscar W. Underwood has been grant-
ed two more years of power or, rather,
he took it because of his position and
his domination of the house. For two
years he has had control and given sat-
isfaction to his party. His next two
years will be much more difficult, be-
cause now he has got to put through
legislation. The bills which he passed
last congress were doomed to defeat
by veto. Now his bills are to become
law in some form. He will do well to
hold his party in hand for the next two
years as he has in the past.

LEAVE OF ABSENCEPeculiar Case Before New York
School Board.New York, March 13.—The privi-
leges of maternity cannot be claimed
by a New York public school teacher,
the board of education decided, in de-
nying the application of Mrs. Kath-
erine C. Edgell, for a year's leave of
absence to bear a child.Her case, which has been pending
before the educational powers of the
city for several weeks, enlisted the
sympathy of only five members of the
board when it came to a final test.Of these, two were women—one a
matron, one a spinster.
Thirty-two members declared them-
selves by their votes unable to help
this woman high school teacher to
solve the problem of making the duties
of a school mistress not entirely in-
compatible with those of a housewife
and mother. By a vote of 28 to 9 the
board voted beforehand not even to
allow the question to be debated.A suspension of the by-laws would
have been necessary to grant Mrs.
Edgell's application.

May 3. The parade will be headed
by the National American Woman
Suffrage association, divided into sev-
en groups.The groups will comprise the na-
tional officers, delegations from the
nine suffrage states; delegates from
states where the suffrage amendment
is ready to be submitted to the vot-
ers; from the states where the amend-
ment is awaiting action by a second
legislature before submission; from
states in which the suffrage bill
has passed one house this session;
from states in which petitions initi-

that his wife has failed to properly
cook food he had supplied, that as a
result his health has been seriously
impaired and that she is a "large,
powerful woman, and well able to car-
ry into execution threats of violence,
repeatedly made by her," the com-
plaint of Edward Strevesky, asking
divorce from Mary Strevesky, was
filed in district court. The husband is
fifty-eight years of age and the wife
forty-seven. They were married Jan.
27, 1883, at Oshkosh, Wis., and of
their twelve children ten are living.
Mr. Strevesky claims that his wife
deserted him Sept. 23, 1909, and has
since refused to live with him.

that she was unable to come, although
she was not seriously ill.The speakers declared that militant
tactics would be continued, Miss
Brackenbury saying that if they could

they must get it by any means in

Resolution in Minnesota House to Ap-
point Committee.St. Paul, March 13.—A joint resolu-
tion for the appointment of a com-
mittee of six house and three senate
members to conduct a vice probe was
introduced in the lower branch by
Thomas Kneeland of Minneapolis.
Charles N. Orr of St. Paul and Albert
Praeder of New Ulm. The joint resolu-
tion was referred to the committee
on crimes and punishments. The mes-
sage from Governor Eberhart approv-
ing the request of Lieutenant Govern-
or O'Hara of Illinois for a vice probe
here preceded the resolution in the
house only a few hours.The house concurred in the senate
action in passing a bill providing for
the appointment by the supreme court
of two supreme court commissioners
who will sit with supreme court judges
and assist in the decisions of the
court. The commissioners are to
draw \$7,500 a year, the same as the
judges, and the bill virtually enlarges
the court from five to seven judges.

Lack of Time to Eat.New York, March 13.—Complaints
of excessive periods of labor, weak-
ness from lack of food, increase of
work, exhaustion from overheat, blistered
hands, scorched clothing and added
responsibilities were made by
railroad firemen as witnesses before
the arbitration board which is seek-
ing to settle the firemen's demands on
fifty-four Eastern roads for better pay
and extra firemen on large locomotives.Judge William L. Chambers, chair-
man of the board, announced that he
had been informed, after communicating
with Washington, that Sundays
are not to be reckoned in the thirty
days allowed for the board to reach a
decision on the controversy. This an-
nouncement means that the board will
have until about April 5 to consider
the firemen's demands.

ing a fine of \$10, died in a hospital
here. Death resulted from an abscess.Government officials declared Mrs.
Hall was the leading spirit of a band
of smugglers who were active in
bringing contraband Chinese coolies
into the United States from Mexico.
Mrs. Hall was only twenty-six years
old. Two indictments were pending
against her at the time of her death.

of one of the deceased. Gas fumes
escaping from the engine of an auto-
mobile are believed to have caused
their deaths.

UNIVERSITY WEEK PLANS UNDER WAY

President of Commercial Club Carl Zapffe Receives Letter From Professor Samuel Quigley

DESCRIBES SOME CHANGES

Propose to Put Fewer Numbers Into the Program and to Make Quality Superior Throughout

President Carl Zapffe of the Brainerd Commercial club has received a letter from Prof. Samuel Quigley, of Minneapolis, wherein Mr. Quigley states the developments regarding the plans for the "University Week" of this year.

A conference was held with President Vincent of the university this afternoon when further details were arranged.

It is the purpose of the university this year to put into the program fewer numbers but to make the quality superior throughout. There was some complaint last year that the programs were too crowded and also that some of the material should have been eliminated. By reducing the length of the programs the committee will be able to secure the best talent from the university and from outside the state to present the various subjects from the standpoint of experts. It is the expectation also to make the evening programs stronger than those of last year. All second class lectures and performances will be eliminated.

Each person will be given an hour for his lecture or demonstration and in the evening program no attempt will be made to crowd into one night both the Glee club and concert.

STATE LEAGUE DEBATE

Crookston High Debates Brainerd High at High School This Friday Evening, March 14

The state league debate, when the Crookston high school debates the Brainerd high school, will be held at the high school auditorium on Friday evening, March 14, commencing at eight o'clock. An admission of 25 cents will be charged in order to meet the heavy expenses incurred by the debate.

Mayor H. P. Dunn will preside and the judges will be from the departments of public speaking, economics and English of the university of Minnesota. The Brainerd debaters are Miss Nora Barron, Miss Jean Mosier and Werner Lund.

The public is asked to come and hear the question of the government ownership of railroads handled by young people from the high schools. The committee desires that the public should encourage the discussion of current day problems by purchasing tickets to the debates, and suggests that a visit to the local high school assembly room will do any one good.

MUSIC AND DRAMA

At the Empress

The "Princess and the Man" is one of the most spectacular dramas released by the Edison people in some time. The scene in the palace when the mob enters to plead with the king is wonderfully impressive and intensely dramatic. The excellent cast, including the mob itself, makes this a notable picture from every standpoint. The plot in brief is as follows: a haughty old king, long out of sympathy with his people, scorns their demand for good government, but his daughter realizes conditions and when the mob enters the palace, she pleads in their behalf and wins her father over.

WILLIAM LESLIE TAYLOR OF BRAINERD, HIS COMPANION IS REPORTED IN GOOD HEALTH.

W. J. Bryan, secretary of state, sent a telegram to Governor A. O. Eberhart yesterday confirming the above dispatch. The information comes from the American consul at Maracaibo.

Mr. Borge of Duluth, is trying to get into communication with his son by telegraph to ascertain the seriousness of his condition.

A PARSONAGE TO BE ERECTED

\$2500 Has Been Raised by Committee of the First Congregational Church of City

BUILDING WILL COST \$3500

Remittances May be Sent to George D. LaBar or to the Minister, Mr. G. P. Sheridan

For a number of years it has been in the minds of the donors of the First Congregational church to erect a parsonage, but nothing definite has ever been done until the last few months. Last September a committee was appointed to investigate the advisability of such a project, and reported three months later favorably. At a meeting held Feb. 6th, the committee recommended in their report that a sum of at least \$2500 be raised before the project should become definite. Accordingly a committee was appointed to secure pledges and to report in a month and \$2344 was raised. A time limit of five days was given to make the stipulated sum \$2500 and yesterday the report was given to the chairman that the full amount had been raised.

This means the parsonage will be erected within the near future. The following building committee has been appointed and empowered to take the necessary steps towards its erection: W. A. M. Johnston, E. J. Cook, P. W. Donovan, E. P. Slipp, G. D. LaBar, Miss M. Whiteley, Miss S. Robinson, Rev. G. P. Sheridan, ex-officio. This committee will meet at the home of Mrs. A. E. Losey on Friday night of this week at eight o'clock to organize and discuss things preliminary relative to the project.

One of the encouraging features of this project is the fact that the \$2500 in pledges is to be paid in three installments, one-third on March 15, one-third June 15, one-third September 15. It is desired that those who have pledged will kindly note that the first installment is due Saturday March 15. A special account has been opened with the First National bank known as "The Parsonage Fund" and if the donors will remit to the bank it will save a lot of unnecessary clerical work.

This is a project that will interest all who have the community's interests at heart. If anyone has been overlooked by the committee on pledges and is desirous of thus expressing his interest, he is asked to please send remittance or see either G. D. LaBar or the minister.

Take Notice B. P. O. E.

Trades & Labor Assembly Has a Special Meeting at Labor Temple Last Evening

COMMITTEE IS APPOINTED

\$50 Voted to be Raised to Fight Against Proposed Location Corner Laurel and Fifth

The Trades & Labor assembly of the city, at a special meeting held in Labor temple last night, voted to raise \$50 to finance a fight against the proposed location of a city hall at the corner of Laurel and South Fifth streets.

The city council, at its last meeting, voted to purchase from George H. Gardner lots 22, 23 and 24, block 45, paying therefor \$1,500. The Trades & Labor assembly has taken exception to the location of the site. A committee consisting of Richard Ilse of the Mouders union, Martin Seigel of the machinists union and Charles Sundberg of the barbers union, was appointed to see what action can be taken against the location of the proposed site and the committee will report at the next meeting of the assembly to be held Wednesday evening, March 19.

Any parcel of fourth class matter weighing not more than 11 pounds nor greater in size than 72 inches in length and girth combined, can be sent by parcel post to any one of the cities or villages named above, from the Brainerd postoffice, which are in the 50 mile limit or first zone, at the following rate:
1 pound, 5 cents; 2 pounds, 8 cents; 3 pounds, 11 cents; 4 pounds, 14 cents; 5 pounds, 17 cents; 6 pounds, 20 cents; 7 pounds, 23 cents; 8 pounds, 26 cents; 9 pounds, 29 cents; 10 pounds, 32 cents; 11 pounds, 35 cents.

The local rate, which is applicable to parcels intended for delivery at the office of mailing, which in this case would be Brainerd, or on a rural route starting therefrom is as follows:
1 pound, 5 cents; 2 pounds, 8 cents; 3 pounds, 11 cents; 4 pounds, 14 cents; 5 pounds, 17 cents; 6 pounds, 20 cents; 7 pounds, 23 cents; 8 pounds, 26 cents; 9 pounds, 29 cents; 10 pounds, 32 cents; 11 pounds, 35 cents.

Parcel post stamps must be used on all domestic matter of the fourth class and they will not be received for mailing unless this requirement is complied with.

A parcel will not be received for mailing unless it bears the name and address of the sender, preceded by the word "From."

The special delivery of parcel post matter is now permissible, and special delivery stamps or ordinary postage stamps may be affixed. When ordinary stamps are used for this purpose the words "Special Delivery" must be written or printed in a prominent place on the parcel. Parcel post stamps are not valid and cannot be used in lieu of special delivery stamps.

The above rates also apply to the following offices of mailing: Sylvan, Pillager, Hubert, Merrifield, Barrows, Crow Wing, Ft. Ripley, Portview, Homebrook, Ausland.

War in the Balkans also to Influence Spring Styles, According to the New Fashion Authority

"Good Dressing," the new fashion magazine issued with the compliments of "Michael's" to the women of Brainerd in its second issue, under the head of "What New York Women are Wearing," has this to say about the new styles:

"This will be a season of brilliant effects, the Bulgarian and Oriental colorings predominating; there are also wonderful effects in Pompadour and Jouy designs. The fancy for things Chinese in cut and material has invaded not only the realm of the elaborate tea and evening gown, but finds expression in fancy little cretonnes or chintz printed coats to be worn with lingerie or linen dresses. They are an odd and quaint accessory to the summer wardrobe, and with a hat and parasol of the same material and design the ensemble of a pretty summer girl is most fascinating. These coatees are simple to make, require no trimming other than harness buckles or buttons; the usual lining is also omitted, the seams neatly bound with satin binding. All textures from the sheerest to the heaviest have been touched with the magic of the color wand."

From this talk of fashion motives, "Good Dressing" gives a discussion of the current styles for Spring by Harrison Fisher—the famous artist and portrayer of American women. Mr. Fisher selects three charming designs for spring gowns, which are illustrated in full length and gives them as his idea of the clothes appropriate for the American woman of today. Mr. Fisher chooses as the ideally well-dressed woman that one who chooses her clothes—both style and materials—after a study of her own personality. Though he states it is difficult for most women to realize their defects and shortcomings.

"Good Dressing" also contains a story of a woman who unwittingly discharged her own husband—a story with a heart throb and a tale of household economics that should carry a real message to every one who reads it.

"Good Dressing" is a beautiful 32-page magazine devoted to fashions generally, edited by the editors of The Ladies' Home Journal, and a cooperative arrangement with 3,000 other merchants enables "Michael's" to distribute it to patrons without any cost to them.

Didn't Want Much.

Here is an advertisement from an old copy of an English Journal:
"Wanted, for a sober family, a man of light weight, who fears the Lord and can drive a pair of horses. He must occasionally wait at table, join the household prayer, look after the horses and read a chapter of the Bible. He must God willing, arise at 7 o'clock in the morning and obey his master and mistress in all lawful commands. If he can dress hair, sing psalms and play at cribbage the more agreeable. Wages, 15 guineas a year."

YOU'LL WANT IT

ALL THE TIME

Once you have tasted the delicious nut-like flavor of "Minnesota" Macaroni, you will want to eat it every day. There has never been any macaroni like it before—none so firm, so nutritious and so savory.

"Minnesota" Macaroni is one of the best and most nourishing foods known—yet it costs only about one cent a dish. Serve it at least twice a week in place of meat. You will save money and your family will enjoy better health.

"Minnesota" Macaroni is especially fine for children—it builds strong bodies and does not overload the stomach.

Try the handy "Minnesota" Cut Macaroni, which is cut into uniform pieces—it cooks more evenly and is quicker to prepare.—Advt.

YOUNG MADRID VENGEFUL.

Youth in Cornell is heartbroken over Brothers' Deaths.

"My brothers shall be avenged!" declared Evaristo E. Madero, a student at Cornell, when he heard recently his brother Emilio had been killed by Huerta's troops.

The young man, who is nearly prostrated, denied, however, that either he or his brother Carlos, the youngest of the family, who is in school near Milwaukee, had any plans to lead a revolt against Diaz and Huerta.

Carlos wired his brother that he would join him in Ithaca. They expect to hold a conference and await instructions from their relatives.

Evaristo Madero was in a pitiable condition. He was confined to his room in the Spanish-American club, and his clubmates refused to allow any one to visit him.

He Filled the Bill.

A stranger when dining at a foreign hotel was accosted by a detective, who said to him: "Beg your pardon. We are in search of an escaped convict, and as a matter of form will you oblige us by showing your passport?"

"Do I look like a convict?"

"Possibly not. In any case I shall require to see your passport."

The stranger, feeling annoyed, presented the officer with the bill of fare, and the latter commenced to read, "Sheep's head, neck of mutton, pig's feet."

"Very good," he observed. "The description tallies. You will please come along with us."—Boston Traveler.

FEEL BULLY? TAKE CASCARETS TONIGHT

A 10 Cent box will keep your liver, stomach and bowels clean, pure and fresh for months. Sick headache, biliousness, dizziness, coated tongue, foul taste and foul breath—always trace them to torpid liver, delayed fermenting food in the bowels or sour, gassy stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Salts, cathartic pills, oil and purgative waters force a passage way for a day or two—yes—but they don't take the poisons out and have no effect upon the liver or stomach.

Cascarets immediately cleanse and regulate the stomach, remove the sour, undigested and fermenting food and foul gases, take the excess bile from the liver and carry out of the system all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely straighten you out by morning. They work while you sleep—a 10 cent box from your druggist means your head clear, stomach sweet and your liver and bowels clean and regular for months.—Advt.

EGGS HATCHED BY CHEMISTRY

Frog Produced by Science Grows Up.

SECRET OF LIFE IS FOUND.

How Germs Are Fertilized Discovered by Physicians—They Experiment With Sea Urchins and Produced Hybrid Marine Life—Puncture Frogs' Eggs in Unique Tests.

Professor Jacques Loeb of the Rockefeller Institute, speaking before the Manhattan Medical society in New York recently described some of his recent experiments in artificial reproduction by fertilization of specimens of animal life that developed to maturity. Professor Loeb excited great interest by relating that a female frog, produced from an artificially fertilized egg, was found on dissection after accidental death to be equipped for parenthood. This frog had reached adult life.

The physicians followed closely Dr. Loeb's description of his experiments. Professor Garry N. Calkins of Columbia university led the discussion which followed. Professor Loeb asserted that as a result of his experiments he had not only learned how to imitate the effect of the spermatozoon in nature, but to learn the nature of the spermatozoon itself and its method of action. He said:

"The egg in nature is only able to develop after the spermatozoon has entered into it. The spermatozoon calls the egg not into life—for it had life already—but into a new being. The question before biology has been, 'How?'

"Previously biologists answered this question in the same way that a few years ago was answered questions concerning contagious diseases, by hypotheses, by guesses. Biologists compared the egg to a clock and said the spermatozoon wound it. Loeb put his metaphor into terms of chemistry and called the spermatozoon a ferment which set up vibrations in the egg.

Imitating the Spermatozoon.
"The problem of artificial fertilization was to do what the spermatozoon does by simple physico-chemical means. Observation of the natural process showed visible changes in the egg after the entrance of the spermatozoon. The entrance was followed by a halo forming about the egg, called the fertilization membrane. We found that this was the important thing in the process, not any change in the nucleus, as we had supposed.

"Experimentation led to the discovery that this same halo, or fertilization membrane, followed the application of monobasic fatty acids, such as acetic acid or butyric acid. We started with the sea urchin egg, because that is constant, and we wanted to be able to repeat our experiments.

"We found when we added a monobasic fatty acid to sea water, in which to immerse the egg, that in some cases at low temperatures the egg developed into a larva and perished. At room temperatures the eggs divided. It was plain that the acid alone did not produce a sufficient effect.

"To prevent the disintegration we hit upon a second treatment. We took the egg from the acid sea water and put it into hypertonic sea water—water to which sugar or salt had been added. This had the effect of drawing some of the water from the egg, about which the fertilization membrane had formed, and a great many of the eggs developed normally. From this we drew the conclusion that the eggs needed a double treatment and that the spermatozoon contained the double treatment in exactly the right proportions. All eggs did not form the fertilization membrane when subjected to the first treatment, a circumstance often embarrassing to the experimenter. We then discovered that all eggs could be made equally sensitive by treating them first with barium chloride or strontium chloride.

Marine Life Hybrid.

"Our next experiment was the attempt to fertilize the sea urchin egg with the sperm of a remote species. Ordinarily hybrids do not occur in marine life. This is remarkable, as biologists observed, when various related sea creatures spawn in the same waters. We succeeded, however, in fertilizing sea urchin eggs with starfish sperm by introducing a certain amount of alkalinity into the water."

Professor Loeb explained that the eggs of frogs were started on the road to development by merely puncturing them. This, he said, convinced him that the breaking of the outside of the egg was the important factor, accomplished in nature by chemical action of the spermatozoon, in his earlier experiments by chemical dissolution of its natural protection. Experiments both with naturally fertilized and artificially fertilized eggs, he said, showed that the first effect of the formation of the halo was to increase oxidation six times. This oxidation, he said, was the force which stirred the cell to development.

What is Caddie?

Is it a corruption of the word "caddy," meaning one who holds the "tee?"

Or is it the diminutive of cad—a small cad?

Or is it from "kados," the Doric form of the Greek word "kados," meaning "one who suffers sorrow or affliction" one who mourns, one who attends a funeral procession?"

Or is it from another Greek word, "kados," which may mean either "a collecting box" or "a cask containing liquor?"—World of Golf.

FALLS 17 STORIES—LIVES.

Workman Smokes Two Cigarettes After Plunge From Dizzy Height.

John Brunnen, a marble worker, twenty-six years old, fell down an elevator shaft in the new Municipal building of New York from the seventeenth story to the basement recently. He sustained fractures of both legs.

It was a few minutes after 5 o'clock that Brunnen and some fellow workmen were waiting for an elevator. Brunnen looked down the temporary shaft, became dizzy and plunged down. Workmen hurried to the basement expecting to find Brunnen dead, but instead the young man was lying on a pile of empty cement bags. He was conscious, and his first request was for a cigarette.

Brunnen smoked two cigarettes and was about to light a third when Father Evers of St. Andrew's church arrived and put a stop to the smoking while he administered the rites of the church.

"WILCOX GLIDE" HAS ARRIVED

New Dance to Supplant Turkey Trot Is Invented.

A new dance, the Ella Wheeler Wilcox glide, was introduced recently in Earl hall, Columbia university, New York, at a reception given by the Western club of the college, under the auspices of the university forum.

Mrs. Wilcox herself consented to dance the newly invented steps, with Louis F. Chalf, formerly of the Metropolitan Opera company, as her partner. The dance is a sort of combination of the valse and the minuet and is intended to supplant dances such as the turkey trot, which have come under ban.

Miss Jane Beers is the inventor of the Wilcox glide.

Judge Holds Residence There Entitles One to Naturalization.

Judge Thompson in the naturalization court at Philadelphia recently decided that the canal zone is a portion of the United States and that residence in the canal zone permits a person to seek naturalization in this country.

The decision was given in the case of Louisa Kurath. The government sought to bar the woman from naturalization, although she had been employed as a government nurse in the canal zone for the last six years.

Cannon Sells Farm For \$100,000.

Ex-Congressman Cannon recently sold his farm, a 400 acre plot, at Fifth, west of Danville, Ill., to Edward Stephens and Frederick Endicott, both of Fifth, for \$100,000. The land was bought by Mr. Cannon in 1880 at \$25 an acre.

WOMAN FAILS TO FIND GOLD ON COCOS ISLAND.

Treasure Hunting Expedition Comes Back After Fine Time.

The treasure hunting expedition led by Miss Genevieve Davis, an English woman, which had been looking for buried gold on Cocos island for many months, got back to the city of Panama recently. A good time was had by all. No treasure was recovered.

Benito Bonito was a regular pirate, who in the early part of the nineteenth century settled down to "singling the beard of the king of Spain" along the coast of Mexico. When he got any money together he buried it on Cocos island after the manner of pirates and made a map with the skull and crossbones marking the spot where the treasure was hid. His heirs have made a substantial living selling these maps to those whom romance and the works of R. L. Stevenson have touched.

Miss Davis' expedition started out from Plymouth with one of the maps and a vessel armed with a six pounder to fight the natives of Cocos island, which lies 550 miles southwest of Panama, on Sept. 10 last. The only woman besides Miss Davis aboard the ship was her friend Mrs. Barry Till.

Two other expeditions left respectively from France and Victoria, B. C., with maps similar to that of Miss Davis. Nothing has been heard of them recently.

A Shine In Every Drop!

Black Silk Stove Polish is, without doubt, the best polish on the market. It does not dry out, can be used on the last drop; liquid and paste one quality; absolutely no waste; no dust or dirt. You get your money's worth.

Black Silk Stove Polish is not only most economical, but it gives a brilliant shine that cannot be obtained with any other polish. Black Silk Stove Polish does not rub off—it lasts four times as long as ordinary polish. It saves time, labor, and money. Don't forget—when you want your house to shine like a mirror, use Black Silk. If it isn't the best thing you ever used, your dealer will refund your money.

The great tract is in the southwestern part of Wisconsin, extends over parts of three counties, and the discoverers believe that an area sixty miles long and forty miles wide is largely underlaid with ore of rich percentage in metallic iron.

Assays range from 54 per cent to over 60 per cent metallic iron, most of it non-Bessemer, but with possibilities of developing Bessemer quality at a lower depth.

The ore is near the surface, being in places only twenty feet beneath, while in the best explored tract the mineral is eighty feet below the surface and has been tested through a depth of forty feet. One area tested out contains approximately 2,000,000 tons of ore, valued at about \$8,000,000.

CONGRESS WILL
GATHER APRIL 7President Wilson Decides on
Extra Session Date.

CONFERS WITH UNDERWOOD

Democratic House Leader and Chief Executive Agree That Tariff Shall Be the Only Subject Given Consideration—Banking and Currency Changes Will Come Up at Regular Session.

Washington, March 13.—President Wilson's proclamation assembling the Sixty-third congress in special session will fix April 7 as the date and suggest that the revision of the tariff should be the only subject given consideration.

These facts became known following a conference between President Wilson and Representative Oscar W. Underwood, the Democratic leader of the house.

It has been decided that action on a measure proposing changes in the banking and currency laws shall be deferred until the regular session of congress that will begin in December.

After consideration of all the facts the president came to the conclusion that it would be better to restrict the work of the special session to the tariff revision bills in order that they might be placed on the statute books at the earliest practicable date.

It was pointed out to the president that until uncertainty concerning the tariff program of the Democrats has been dissipated business in many lines will to some extent be suspended. The argument was made that concurrent action on the tariff and banking and currency laws would delay enactments in both instances, with a possibility of a serious disturbance in business.

Cabinet Approves Course.

The president will send first a message pointing out the necessity for tariff revision and will follow this with a series of messages upon specific things which he believes congress may be able to act upon without unnecessarily prolonging the session. This course is said to have been approved at a cabinet meeting.

It was originally the intention of President Wilson to call congress together on or about April 1. At the instance of Chairman Underwood and his associates on the ways and means committee it was decided that congress should meet on April 7. The change in date was made to give the tariff makers of the house more time to complete the revision bills.

Although congress adjourned more than a week ago the ways and means committee has made little progress on the measures. Of the sixteen bills that will represent the proposed revision work only two have been finished. In these cases the decisions are tentative in the main, subject to change when the bills come up for a final reading in committee.

The house leaders are elated over the determination of the president to co-operate with them in limiting the business of the special session to the tariff. In the first place it means that congress will adjourn in a comparatively reasonable time.

The Republicans will not filibuster against the Democratic tariff bills. They will register their protests in given cases, making no effort to prevent the dominant party from putting through its program. In the second place the president's decision means that a complete organization of the house may be put over until December.

RICH YOUNG MAN REFORMER

Assumes Task of Trying to Redeem
Bad Boys.

Milwaukee, March 13.—Nell Wells Norris, millionaire, young son of Mr. and Mrs. Charles Norris of Milwaukee, has undertaken the task of reforming bad boys after every probation officer in the city has given up.

Young Norris saved Alexander Romanowicz a six-year term in the Waukesha industrial school by promising to take the boy in hand. The lad must report to Mr. Norris three times a week and from the \$9.50 a week he earns must pay \$60 for property he destroyed.

Mr. Norris also took in charge Walter Pepper, a boy who continually runs away from home and whose father wants him disciplined.

DEATH PENALTY FOR PASTOR

Arkansas Minister Burned Three
Motherless Children to Death.

Fort Smith, Ark., March 13.—Rev. Marion Capps, a Methodist preacher, was convicted and sentenced to death by a jury in the circuit court here on the charge of having burned to death his three motherless children.

Capps was charged with having tied his five children to an oil soaked bed to which he set fire. Two of the children perished in the flames, while a third died after escaping from the house.

A daughter, Bertha, fifteen years old, and a son, Ellis, fifteen years old, who recovered from their injuries, testified against their father.

PRISON HEAD FACES TRIAL

Sulzer Makes Allegations Against
Colonel Scott.

Albany, N. Y., March 13.—Charges of "nonfeasance and neglect of duty" were preferred against Colonel Joseph F. Scott, superintendent of state prisons, by Governor Sulzer.

The charges are based largely upon the report submitted by the governor's committee of inquiry. They are based upon the allegations made concerning the payment of \$25,000 to Attorney Anshut by Harry K. Thaw in an alleged bribery attempt involving Superintendent John W. Russell of Matteawan.

The specific charge also is made that Colonel Scott intentionally tried to defeat the demand of the governor for the dismissal of Dr. Russell by accepting his resignation over the telephone.

INSURGENT FORCES
TAKE AGUA PRIETAMexican Regulars Evacuate With-
out Firing a Shot.

Douglas, Ariz., March 13.—Agua Prieta fell to Constitutionalists sympathizers, who crossed the border from Douglas. Not a shot was fired and General Ojeda, commanding the federal garrison, with about 500 men, evacuated the town, leaving thirty rural police to guard federal interests.

After the surrender of the border town 650 state troops, under Elias Galles, arrived, and a provisional municipal government was set up. Twenty-four of the guards left by General Ojeda deserted to the rebel standard and the six who refused to join the Constitutionalists were ejected from the town.

Unarmed men from Douglas crossed the border and reinforced the rebel garrison. The new arrivals found 18,000 rounds of ammunition, some rifles and camp supplies left by the federals in their haste.

Those in control of the border town and port are celebrating the bloodless victory. "Viva la constitution" is the cry resounding through the streets of the little Mexican town.

STEEL SCHEDULE DRAFTED

Majority of House Committee De-
clines on Tentative Rates.

Washington, March 13.—The Democratic task of preparing for tariff revision advanced another stage when the majority of the house ways and means committee put the finishing touches on the iron and steel schedule after having previously disposed of the two preceding schedules—A, the chemical; and B, the earthenware. The members of the committee say rates written into the schedule are only tentative.

It was learned that the extent to which the house committees will be named at the outset of the extra session of congress will depend mainly on the recommendation of the president as to the scope of the legislation.

Illinois Executive Favors Meeting of
Governors.

Springfield, Ill., March 13.—A conference of governors and others interested in the suppression of vice and the amelioration of the condition of working girls promises to be one of the early results of the investigation started by the white slave committee of the senate.

In conference with Lieutenant Governor O'Hara, Governor Dunne suggested that such a conference would be desirable. Lieutenant Governor O'Hara will get into immediate communication with the governors of Michigan, Iowa, Missouri, Kentucky, Wisconsin and Indiana, suggesting a general conference in Springfield at an early date.

WILSON'S CRITICS
HAVE A BIG FIELDWhen He Breaks Precedent It
Is Cue For Complaint.

TAFT'S DISCIPLES ACTIVE.

Friends of Ex-President and Others in Party Which Held Power For Sixteen Years Find It Hard to Give Up Old Methods Without Making a Fuss. Office Seekers Chagrined.

By ARTHUR W. DUNN.

Washington, March 13.—[Special.]—President Wilson has given the critics plenty to do. In fact, everything that he has done which is different from the actions of his predecessor has given the friends of the former president a cue to carp and complain. But that is to be expected. It is rather hard for a party which has been in power sixteen years to give up without making a fuss about it.

Besides, President Taft gathered about him quite a number of very devoted followers who became united in their dislike of Roosevelt and their antipathy to certain Democrats. These are bound to be on hand with complaints about the manner in which things around the White House are managed. Meanwhile it may be well to keep in mind that Wilson is going to be president for the next four years.

The Notice to Office Seekers.

Probably nothing caused quite so much anguish as the decision of President Wilson that he would not see office seekers personally. Next to getting an office it is the dearest joy of an applicant to be able to have a heart to heart talk with the president and tell him what great work the office seeker put in for the man in the seat of power. He, at least, has something to take home with him.

Not since the days of Chester A. Arthur has there been anything like the turning of appointment of officers over to cabinet members. That president relied almost wholly upon his cabinet to make the appointments, and they were very successful. When Cleveland came into office he took personal charge of nearly every appointment, and his successors have done the same. Cleveland also took over much of the business therefore transacted by the departments, a practice his successors have followed.

From Foreign Lands.

If Secretary Bryan should move all the things in his Fairview home to his residence in Washington every diplomat representing a foreign country would be able to see some very valuable work of art or bric-a-brac from his home country, besides much that came from regions not represented in the diplomatic list. In his travels abroad Mr. Bryan obtained many things of value and interest, which adorn his home in Nebraska.

Bourne Without Pay.

Although not a senator Bourne of Oregon will continue to work as a senator and for the government, but without pay. He is a member of two postal commissions, one in regard to railway mail pay and second class mail and the other regarding good roads, but he would not allow provision to be made for paying him a salary. Bourne asserted that he would not consent to be in the "lame duck" class, which means getting a job when out of congress.

Almost "Leave to Print."

Senator Owen of Oklahoma came dangerously near trenching upon a rule of the senate which does not allow "leave to print" speeches inserted in the Record. Along in the middle of the night before adjournment he took the floor to deliver a set speech, which he had prepared several days before. But he only "touched the high places," skipping like a senate reading clerk when the senate considers an appropriation bill.

The senate prides itself upon the fact that no "leave to print" speeches are made in the body, thereby holding itself upon a higher plane than the house, where much of the matter appearing as speeches is of the "leave to print" kind.

Left Over Appropriations.

Had there been no extra session in sight neither sundry civil bills nor the Indian appropriation bill would have failed. The former would have been passed over the veto of the president and the Indian bill would have been compromised in some way. With the bill feeling displayed at times in both house and senate it is rather surprising that so many of the supply bills were not defeated.

It takes a man of nerve to talk a appropriation bill to death. Senator Fall of New Mexico displayed that kind of nerve on the Indian bill. He does not want the Apaches returned to New Mexico, for which the bill provides.

Underwood in Power.

Oscar W. Underwood has been granted two more years of power or, rather, he took it because of his position and his domination of the house. For two years he has had control and given satisfaction to his party. His next two years will be much more difficult, because now he has got to put through legislation. The bills which he passed last congress were doomed to defeat by veto. Now his bills are to become law in some form. He will do well to hold his party in hand for the next two years as he has in the past.

Los Angeles, March 13.—Sarah Bernhardt, the noted French actress, suffered painful, but probably not serious, injuries in an automobile accident here.

She was on her way to Los Angeles from Venice when her automobile collided with a heavy truck. The machine was wrecked and the actress suffered two wrenched ankles, a lacerated lip and bruises in body.

REFUSES TEACHER
LEAVE OF ABSENCEPeculiar Case Before New York
School Board.

New York, March 13.—The privileges of maternity cannot be claimed by a New York public school teacher, the board of education decided, in denying the application of Mrs. Katherine C. Edgell, for a year's leave of absence to bear a child.

Her case, which has been pending before the educational powers of the city for several weeks, enlisted the sympathy of only five members of the board when it came to a final test. Of these, two were women—one a matron, one a spinster.

Thirty-two members declared themselves by their votes unable to help this woman high school teacher to solve the problem of making the duties of a school mistress not entirely incompatible with those of a housewife and mother. By a vote of 28 to 9 the board voted beforehand not even to allow the question to be debated.

A suspension of the by-laws would have been necessary to grant Mrs. Edgell's application.

WOMEN TO MARCH IN GOTHAM

Largest Suffrage Parade to Take
Place There May 3.

New York, March 13.—What is planned to be the largest parade yet held in the interest of woman suffrage will take place here Saturday, May 3. The parade will be headed by the National American Woman Suffrage association, divided into seven groups.

The groups will comprise the national officers, delegations from the nine suffrage states; delegates from states where the suffrage amendment is ready to be submitted to the voters; from the states where the amendment is awaiting action by a second legislature before submission; from states in which the suffrage bill has passed one house this session; from states in which petitions initiating suffrage legislation are circulating and from states whose legislatures have failed to act on a suffrage bill this year.

Minneapolis Man Says Wife's Cooking

Minneapolis, March 13.—Alleging that his wife has failed to properly cook food he had supplied, that as a result his health has been seriously impaired and that she is a "large, powerful woman, and well able to carry into execution threats of violence, repeatedly made by her," the complaint of Edward Strevesky, asking divorce from Mary Strevesky, was filed in district court. The husband is fifty-eight years of age and the wife forty-seven. They were married Jan. 27, 1883, at Oshkosh, Wis., and of their twelve children ten are living. Mr. Strevesky claims that his wife deserted him Sept. 23, 1909, and has since refused to live with him.

SUFFRAGISTS NOT LADYLIKE

Speakers Favor Continuing Militant
Tactics.

London, March 13.—The condition of Mrs. Emmeline Pankhurst, the suffragette leader, still is causing some concern. She was announced one of the speakers at a meeting at Kensington, but the chairman explained that she was unable to come, although she was not seriously ill.

The speakers declared that militant tactics would be continued. Miss Brackenbury saying that if they could not get the vote by ladylike means they must get it by any means in their power.

MAY CONDUCT VICE PROBE

Resolution in Minnesota House to Ap-
point Committee.

St. Paul, March 13.—A joint resolution for the appointment of a committee of six house and three senate members to conduct a vice probe was introduced in the lower branch by Thomas Kneeland of Minneapolis, Charles N. Orr of St. Paul and Albert Pfander of New Ulm. The joint resolution was referred to the committee on crimes and punishments. The message from Governor Eberhart approving the request of Lieutenant Governor O'Hara of Illinois for a vice probe here preceded the resolution in the house only a few hours.

The house concurred in the senate action in passing a bill providing for the appointment by the supreme court of two supreme court commissioners who will sit with supreme court judges and assist in the decisions of the court. The commissioners are to draw \$7,500 a year, the same as the judges, and the bill virtually enlarges the court from five to seven judges.

Firemen Also Complain to Board of
Lack of Time to Eat.

New York, March 13.—Complaints of excessive periods of labor, weakness from lack of food, increase of work, exhaustion from overheat, blistered hands, scorched clothing and added responsibilities were made by railroad firemen as witnesses before the arbitration board which is seeking to settle the firemen's demands on fifty-four Eastern roads for better pay and extra firemen on large locomotives.

Judge William L. Chambers, chairman of the board, announced that he had been informed, after communicating with Washington, that Sundays are not to be reckoned in the thirty days allowed for the board to reach a decision on the controversy. This announcement means that the board will have until about April 5 to consider the firemen's demands.

Coolies Expires.

Los Angeles, March 13.—Mrs. Ethel Hall, the so called queen of the smugglers, who passed a year in the county jail before pleading guilty and paying a fine of \$10, died in a hospital here. Death resulted from an abscess.

Government officials declared Mrs. Hall was the leading spirit of a band of smugglers who were active in bringing contraband Chinese coolies into the United States from Mexico. Mrs. Hall was only twenty-six years old. Two indictments were pending against her at the time of her death.

Gas Fumes Kill Two Men.

Minneapolis, March 13.—M. O. Hoglund and Nels Larson were found dead in their automobile repair shop. The bodies of the two men were discovered by A. W. Hoglund, a nephew of one of the deceased. Gas fumes escaping from the engine of an automobile are believed to have caused their deaths.

WAIT LIKE WOLVES FOR PREY

Illinois Vice Commission Receives Epistles Referring to Members as Hypocrites, Afraid to Learn the Truth—Victims Ascribe Their Present Life the Result of Listening to Lying Tempters and Blackguards.

Chicago, March 13.—Reformers and the unreformed—the senatorial vice investigation commission and the women for whose moral downfall the commission is trying to determine the causes—differed on the relation between low wages and low morality. Letters received by the commission from women of the underworld mocked at the work which the members are doing.

One of these letters, signed K. R. L., reads:

"To the Commission: Girls don't go wrong because they are hungry or because they need clothes. They go wrong because they are tempted by lies and overpowered by the evil in men.

"They listen to the fair and pretty things that men tell them and they fall because they think they can trust themselves and trust the tempters. It is not the employer. I was a good girl and I worked in a store.

"I didn't get much money, but that didn't matter. I lived on \$8 a week and would be living like that now—but I met men. They seemed to consider me their prey and all the time it was fight, fight. They wanted to be nice to me, they said, and to take me to the theater and treat me fair and give me a chance to enjoy life.

Didn't Know Men Were Bad.

"I didn't know men were bad—all bad—where a girl is concerned. I thought only women were bad. I thought all a girl had to do to remain good was to be truthful with herself. God pity women who think that and who keep their trust in men until it is too late. Every day it was some one else—always smiling at me, always trying to give me a 'fair chance' to be happy. In the street they followed me—these I could avoid—but the 'friends' who hung around—

"That is the big secret of the thing that makes a good girl bad. If they had left me be—if they had only left me be—only let me live as I wanted to, I wouldn't have had to sink into the room when your commission was trying to solve things and wouldn't have had to sit in a corner with my veil down, afraid to look good women in the face."

Another cry from the underworld echoed the words of the letter above. It was more bitter, though, and it reads in part:

"You're looking for the things that made such women as I. Low wages! Dance halls! Hunger! Cold! They all helped a bit, but they didn't turn the trick themselves. You're all a bunch of hypocrites, afraid to look the thing in the face and afraid to learn the truth.

Hounded by Blackguards.

"I don't know any girls who sold themselves for money to buy bread or clothes. But I know lots of us who hit the road for hell because a lot of blackguards kept hounding them with their rotten 'attentions.' God help the men and not us. We're all right when we start. All we need is to be left alone. There are hundreds and hundreds of kids and sports who hang around State street and wait, like wolves, for the tired girls to leave the store.

"Why don't you make the men be good? All the wages in the world won't help us. Make the men good and the girls will be good. Now they haven't got a chance and they never will as long as the law smiles at one and spits at another." This letter was signed with the initials L. M.

While these comments on the situation continued to pour in, the civic consciousness awakened by the commission bestirred itself in the launching of committees and private investigating forces.

In some stores numbers of girls approached their employers to demand larger salaries.

All were assured that they would be taken care of as soon as something definite has been agreed upon.

**YOUR HAIR BECOMES FLUFFY, BEAUTIFUL
AND LUSTROUS IN JUST A FEW MOMENTS**

Girls! Get a 25 Cent Bottle of "Danderine" and Try This. Also Stops
Falling Hair; Destroys Dandruff

Your hair becomes light, wavy,
fluffy, abundant and appears as soft,
lustrous and beautiful as a young
girl's after a "Danderine hair
cleansing." Just try this—moisten a
cloth with a little Danderine and
carefully draw it through your hair,
taking one small strand at a time.
This will cleanse the hair of dust,
dirt and excessive oil and in just a
few moments you have doubled the
beauty of your hair.

Besides beautifying the hair at
once, Danderine dissolves every par-

ticles of dandruff, cleanses, purifies
and invigorates the scalp, forever
stopping itching and falling hair.
But what will please you most
will be after a few weeks' use when
you will actually see new hair—fine
and downy at first—yes—but really
new hair growing all over the scalp.
If you care for pretty, soft hair and
lots of it surely get a 25 cent bottle
of Knowlton's Danderine from any
druggist or toilet counter, and just
try it.

UNIVERSITY WEEK PLANS UNDER WAY

President of Commercial Club Carl Zapffe Receives Letter From Professor Samuel Quigley

DESCRIBES SOME CHANGES

Propose to Put Fewer Numbers Into the Program and to Make Quality Superior Throughout

President Carl Zapffe of the Brainerd Commercial club has received a letter from Prof. Samuel Quigley, of Minneapolis, wherein Mr. Quigley states the developments regarding the plans for the "University Week" of this year.

A conference was held with President Vincent of the university this afternoon when further details were arranged.

It is the purpose of the university this year to put into the program fewer numbers but to make the quality superior throughout. There was some complaint last year that the programs were too crowded and also that some of the material should have been eliminated. By reducing the length of the programs the committee will be able to secure the best talent from the university and from outside the state to present the various subjects from the standpoint of experts. It is the expectation also to make the evening programs stronger than those of last year. All second class lectures and performances will be eliminated.

Each person will be given an hour for his lecture or demonstration and in the evening program no attempt will be made to crowd into one night both the Glee club and concert.

STATE LEAGUE DEBATE

Crookston High Debates Brainerd High at High School This Friday Evening, March 14

The state league debate, when the Crookston high school debates the Brainerd high school, will be held at the high school auditorium on Friday evening, March 14, commencing at eight o'clock. An admission of 25 cents will be charged in order to meet the heavy expenses incurred by the debate.

Mayor H. P. Dunn will preside and the judges will be from the departments of public speaking, economics and English of the university of Minnesota. The Brainerd debaters are Miss Nora Barron, Miss Jean Mosier and Werner Lund.

The public is asked to come and hear the question of the government ownership of railroads handled by young people from the high schools. The committee desires that the public should encourage the discussion of current day problems by purchasing tickets to the debates, and suggests that a visit to the local high school assembly room will do any one good.

MUSIC AND DRAMA

At the Empress

The "Princess and the Man" is one of the most spectacular dramas released by the Edison people in some time. The scene in the palace when the mob enters to plead with the king is wonderfully impressive and intensely dramatic. The excellent cast, including the mob itself, makes this a notable picture from every standpoint. The plot in brief is as follows: a haughty old king, long out of sympathy with his people, scorns their demand for good government, but his daughter realizes conditions and when the mob enters the palace, she pleads in their behalf and wins her father over.

TAYLOR IS WELL, BJORGE IN HOSPITAL

Special to Dispatch:

Duluth, Minn., March 13.—Duluth News-Tribune: Hans P. Borge received a message last night informing that his son Guy Borge, the mining engineer who was rescued from Indians in Venezuela, is in a hospital at Maracaibo with blood poisoning.

William Leslie Taylor of Brainerd, his companion is reported in good health.

W. J. Bryan, secretary of state, sent a telegram to Governor A. O. Koberhart yesterday confirming the above dispatch. The information comes from the American consul at Maracaibo.

Mr. Borge of Duluth, is trying to get into communication with his son by telegraph to ascertain the seriousness of his condition.

A PARSONAGE TO BE ERECTED

\$2500 Has Been Raised by Committee of the First Congregational Church of City

BUILDING WILL COST \$3500

Remittances May be Sent to George

D. LaBar or to the Minister,
Mr. G. P. Sheridan

For a number of years it has been in the minds of the donors of the First Congregational church to erect a parsonage, but nothing definite has ever been done until the last few months. Last September a committee was appointed to investigate the advisability of such a project, and reported three months later favorably. At a meeting held Feb. 6th, the committee recommended in their report that a sum of at least \$2500 be raised before the project should become definite. Accordingly a committee was appointed to secure pledges and to report in a month and \$2344 was raised. A time limit of five days was given to make the stipulated sum \$2500 and yesterday the report was given to the chairman that the full amount had been raised.

This means the parsonage will be erected within the near future. The following building committee has been appointed and empowered to take the necessary steps towards its erection: W. A. M. Johnston, E. J. Cook, P. W. Donovan, E. P. Slipp, G. D. LaBar, Miss M. Whiteley, Miss S. Robinson, Rev. G. P. Sheridan, ex-officio. This committee will meet at the home of Mrs. A. E. Losey on Friday night of this week at eight o'clock to organize and discuss things preliminary relative to the project.

One of the encouraging features of this project is the fact that the \$2500 in pledges is to be paid in three installments, one-third on March 15, one-third June 15, one-third September 15. It is desired that those who have pledged will kindly note that the first installment is due Saturday March 15. A special account has been opened with the First National bank known as "The Parsonage Fund" and if the donors will remit to the bank it will save a lot of unnecessary clerical work.

This is a project that will interest all who have the community's interests at heart. If anyone has been overlooked by the committee on pledges and is desirous of thus expressing his interest, he is asked to please send remittance or see either G. D. LaBar or the minister.

Are You Constipated?

If so get a box of Dr. King's New Life Pills, take them regularly and your trouble will quickly disappear. They will stimulate the liver, improve your digestion and get rid of all the poisons from your system. They will surely get you well again. 25c at H. P. Dunn's.—Adv't.

The Bohemian club will give a formal dance at Gardner auditorium on Wednesday evening, March 26. Dancing will commence promptly at nine sharp. Music will be furnished by the eight piece Blue Ribbon orchestra. The hall will be beautifully decorated. Invitations were issued last week.

On the arrangements committee are R. E. Clark, William Turcotte, H. J. Carlson, George Mahood and Dr. W. A. Erickson. A large attendance and a most pleasant time is anticipated.

PROTEST AGAINST CITY HALL SITE

Trades & Labor Assembly Has a Special Meeting at Labor Temple Last Evening

COMMITTEE IS APPOINTED

\$50 Voted to be Raised to Fight Against Proposed Location Corner Laurel and Fifth

The Trades & Labor assembly of the city, at a special meeting held in Labor temple last night, voted to raise \$50 to finance a fight against the proposed location of a city hall at the corner of Laurel and South Fifth streets.

The city council, at its last meeting, voted to purchase from George H. Gardner lots 22, 23 and 24, block 45, paying therefore \$11,500. The Trades & Labor assembly has taken exception to the location of the site. A committee consisting of Richard Ilse of the Molders union, Martin Seigel of the machinists union and Charles Sundberg of the barbers union, was appointed to see what action can be taken against the location of the proposed site and the committee will report at the next meeting of the assembly to be held Wednesday evening, March 19.

Take Notice B. P. O. E.

All members of Brainerd Lodge No. 615, B. P. O. Elks, are requested to assemble at Elks hall on Friday afternoon, at 2 o'clock sharp, for the purpose of attending the funeral of our late brother, Robert Stitt.

By order of Exalted Ruler,
FRANK G. HALL,
Secretary
Brainerd, March 13, 1913.

Constable for one year—Frank Krall.

Motley Continues Dry

Motley, Minn., March 13.—In a hard fought contest here the "drys" in the annual village election yesterday defeated the license advocates by a 22 majority and elected an entire "dry" council. This is the third successive year the saloons have been voted out. Village officers elected were: Alfred Wilson, mayor; A. P. Holm, Ed. Brazier and George Palmer, councilmen; W. E. Little, recorder; Charles Bierwagen, treasurer; Charles Akin, constable.

Motley township officers were: W. N. Morey, supervisor; W. E. Little, clerk; Charles Bierwagen, treasurer; U. A. Winslow, justice; Charles Akin, constable.

Pine River Dry

Pine River, Minn., March 13.—Pine River went dry for the third time by a majority of 80 votes. The old council was re-elected with the exception of recorder.

Backus voted to continue "wet" by a vote of 17 to 28.

No Saloons at Aitkin

Aitkin, Minn., March 13.—By a majority of six votes Aitkin decided to worry along without saloons marked twice in the last three years the village has voted out the saloons. It is said the majority of the officers chosen are against saloons. They are: President, J. N. Marr; trustees, Andrew Fajder, Walully Hodgden; recorder, H. C. Beecher; treasurer, Victor E. Erickson; assessor, W. B. Gwathmey; constables, Charles Glad and Jas. Yates.

Dry by 3 Votes

McGregor, Minn., March 13.—By three votes this place voted dry yesterday and elected the following officers: (Continued on page 4)

SERBIAN TROOPS ARE SLAUGHTERED

Special to Dispatch:—

Cettinje Montenegro, March 13.—News reached here today that four Serbian transports loaded with troops yesterday were riddled with shells fired by an unidentified war vessel. Accounts of the engagement from two different sources declare the attacking vessel flew the Austro-Hungarian flag. The number of killed are not known.

WOMEN TO DRESS LIKE CHINESE

Georgious Costumes of The Mandarin Find Favor

War in the Balkans also to Influence Spring Styles, According to the New Fashion Authority

"Good Dressing," the new fashion magazine issued with the compliments of "Michael's" to the women of Brainerd in its second issue, under the head of "What New York Women are Wearing," has this to say about the new styles:

"This will be a season of brilliant effects, the Bulgarian and Oriental colorings predominating; there are also wonderful effects in Pompadour and Jany designs. The fancy for things Chinese in cut and material has invaded not only the realm of the elaborate tea and evening gown, but finds expression in fancy little cretonnes or chintz printed coats to be worn with lingerie or linen dresses. They are an odd and quaint accessory to the summer wardrobe, and with a hat and parasol of the same material and design the ensemble of a pretty summer girl is most fascinating. These coats are simple to make, require no trimming other than harness buckles or buttons; the

usual lining is also omitted, the seams neatly bound with satin binding. All textures from the sheerest to the heaviest have been touched with the magic of the color wand."

From this talk of fashion motives, "Good Dressing" gives a discussion of the current styles for Spring by Harrison Fisher—the famous artist and portrait of American women. Mr. Fisher selects three charming designs for spring gowns, which are illustrated in full length and gives them as his idea of the clothes appropriate for the American woman of today. Mr. Fisher chooses as the ideally well-dressed woman that one who chooses her clothes—both style and materials—after a study of her own personality. Though he states it is difficult for most women to realize their defects and shortcomings.

"Good Dressing" also contains a story of a woman who unwittingly discharged her own husband—a story with a heart throb and a tale of household economics that should carry a real message to every one who reads it.

"Good Dressing" is a beautiful 32-page magazine devoted to fashions generally, edited by the editors of The Ladies' Home Journal, and a co-operative arrangement with 3,000 other merchants enables "Michael's" to distribute it to patrons without any cost to them.

Besides the featured articles, the

April number of "Good Dressing" shows a brilliant variety of designs for new spring dresses and gowns. These designs cover every type of garment that may be required for any occasion, and besides the illustrations the material of which these garments should be made, as well as the manner in which they should be trimmed, is shown in detail.

Young women will read with interest Nancy Norton's letter. Nancy Norton is a young woman attending a New York boarding school, and she writes interestingly telling her friends at home what her New York experiences are. She tells of the New York girls and their clothes, of little trips and pleasures—altogether in April "Good Dressing" it is a letter well worth reading.

The personal service offered by "Michael's" in this new magazine will appeal to and be appreciated by the women of Brainerd, and "Michael's" should be commended for undoubted progressiveness. "Good Dressing" will answer any question on:

The Etiquette of Clothes, Home Dressmaking, Millinery, Children's Clothes, Needlework, or fashions generally, and the April number is now ready for distribution.—Adv't.

Didn't Want Much.
Here is an advertisement from an old copy of an English journal:

"Wanted, for a sober family, a man of light weight, who fears the Lord and can drive a pair of horses. He must occasionally wait at table, join the household prayer, look after the horses and read a chapter of the Bible. He must, God willing, arise at 7 o'clock in the morning and obey his master and mistress in all lawful commands. If he can dress hair, sing psalms and play at cribbage the more agreeable. Wages, 15 guineas a year."

YOUNG MADERO VENGEFUL.

Youth in Cornell is Heartbroken Over Brothers' Deaths.

"My brothers shall be avenged" declared Evaristo E. Madero, a student at Cornell, when he heard recently his brother Emilio had been killed by Huerta's troops.

The young man, who is nearly prostrated, denied, however, that either he or his brother Carlos, the youngest of the family, who is in school near Milwaukee, had any plans to lead a revolt against Diaz and Huerta.

Carlos wired his brother that he would join him in thence. They expect to hold a conference and await instructions from their relatives.

Evaristo Madero was in a pitiable condition. He was confined to his room in the Spanish-American club, and his clubmates refused to allow any one to visit him.

He Filled the Bill.

A stranger when dining at a foreign hotel was accosted by a detective, who said to him: "Beg your pardon. We are in search of an escaped convict, and as a matter of form will you oblige us by showing your passport?"

"Do I look like a convict?"

"Possibly not. In any case I shall require to see your passport."

The stranger, feeling annoyed, presented the officer with the bill of fare, and the latter commenced to read, "Sheep's head, neck of mutton, pig's feet."

"Very good," he observed. "The description tallies. You will please come along with us."—Boston Traveler.

FEEL BULLY? TAKE CASCARETS TONIGHT

A 10 Cent box will keep your liver, stomach and bowels clean, pure and fresh for months.

Sick headache, biliousness, dizziness, coated tongue, foul taste and food breath—always trace them to torpid liver, delayed fermenting food in the bowels or sour, gassy stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Salts, cathartic pills, oil and purgative waters force a passageway for a day or two—yes—but they don't take the poisons out and have no effect upon the liver or stomach.

Cascarets immediately cleanse and regulate the stomach, remove the sour, undigested and fermenting food and foul gases, take the excess bile from the liver and carry out of the system all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely straighten you out by morning. They work while you sleep—a 10 cent box from your druggist means your head clear, stomach sweet and your liver and bowels clean and regular for months.—Advt.

EGGS HATCHED BY CHEMISTRY

Frog Produced by Science Grows Up.

SECRET OF LIFE IS FOUND.

How Germs Are Fertilized Discovered by Physicians—They Experiment With Sea Urchins and Produced Hybrid Marine Life—Puncture Frogs' Eggs in Unique Tests.

Professor Jacques Loeb of the Rockefeller Institute, speaking before the Manhattan Medical society in New York recently described some of his recent experiments in artificial reproduction by fertilization of specimens of animal life that developed to maturity. Professor Loeb excited great interest by relating that a female frog, produced from an artificially fertilized egg, was found on dissection after accidental death to be equipped for parenthood. This frog had reached adult life.

The physicians followed closely Dr. Loeb's description of his experiments. Professor Garry N. Calkins of Columbia university led the discussion which followed. Professor Loeb asserted that as a result of his experiments he had not only learned how to imitate the effect of the spermatozoon in nature, but to learn the nature of the spermatozoon itself and its method of action. He said:

"The egg in nature is only able to develop after the spermatozoon has entered into it. The spermatozoon calls the egg not into life—for it had life already—but into a new being. The question before biology has been, 'How?'"

"Previously biologists answered this question in the same way that a few years ago was answered questions concerning contagious diseases, by hypotheses, by guesses. Biologists compared the egg to a clock and said the spermatozoon wound it. Liebig put his metaphor into terms of chemistry and called the spermatozoon a ferment which set vibrations in the egg."

Imitating the Spermatozoon.
"The problem of artificial fertilization was to do what the spermatozoon does by simple physico-chemical means. Observation of the natural process showed visible changes in the egg after the entrance of the spermatozoon. The entrance was followed by a halo forming about the egg, called the fertilization membrane. We found that this was the important thing in the process, not any change in the nucleus, as we had supposed."

"Experimentation led to the discovery that this same halo, or fertilization membrane, followed the application of monobasic fatty acids, such as acetic acid or butyric acid. We started with the sea urchin egg, because that is constant, and we wanted to be able to repeat our experiments."

"We found when we added a monobasic fatty acid to sea water, in which to immerse the egg, that in some cases at low temperatures the egg developed into a larva and perished. At room temperatures the eggs divided. It was plain that the acid alone did not produce a sufficient effect."

"To prevent the disintegration we hit upon a second treatment. We took the egg from the acid sea water and put it into hypertonic sea water—water to which sugar or salt had been added. This had the effect of drawing some of the water from the egg, about which the fertilization membrane had formed, and a great many of the eggs developed normally. From this we drew the conclusion that the eggs needed a double treatment and that the spermatozoon contained this double treatment in exactly the right proportions. All eggs did not form the fertilization membrane when subjected to the first treatment, a circumstance often embarrassing to the experimenter. We then discovered that all eggs could be made equally sensitive by treating them first with barium chloride or strontium chloride."

Marine Life Hybrid.

"Our next experiment was the attempt to fertilize the sea urchin egg with the sperm of a remote species. Ordinarily hybrids do not occur in marine life. This is remarkable, as biologists observed, when various related sea creatures spawn in the same waters. We succeeded, however, in fertilizing sea urchin eggs with starfish sperm by introducing a certain amount of alkalinity into the water."

Professor Loeb explained that the eggs of frogs were started on the road to development by merely puncturing them. This, he said, convinced him that the breaking of the outside of the egg was the important factor, accomplished in nature by chemical action of the spermatozoon. In his earlier experiments by chemical dissolution of its natural protection. Experiments both with naturally fertilized and artificially fertilized eggs, he said, showed that the first effect of the formation of the halo was to increase oxidation six times. This oxidation, he said, was the force which stirred the cell to development."

What Is Caddie?

Is it a corruption of the word "caddy," meaning one who holds the "tee?" Or is it the diminutive of cad—a small cad?

Or is it from "kados," the Doric form of the Greek word "kedos," meaning "one who suffers sorrow or affliction" or "one who mourns, one who attends a funeral procession?"

Or is it from another Greek word, "kados," which may mean either "a collecting box" or "a cask containing liquor?"—World of Gossip.

FALLS 17 STORIES—LIVES.

Workman Smokes Two Cigarettes After Plunge From Dizzy Height.

John Brunnen, a marble worker, twenty-six years old, fell down an elevator shaft in the new Municipal building of New York from the seventeenth story to the basement recently. He sustained fractures of both legs.

It was a few minutes after 5 o'clock that Brunnen and some fellow workmen were waiting for an elevator. Brunnen looked down the temporary shaft, became dizzy and plunged down. Workmen hurried to the basement expecting to find Brunnen dead, but instead the young man was lying on a pile of empty cement bags. He was conscious, and his first request was for a cigarette.

Brunnen smoked two cigarettes and was about to light a third when Father Evers of St. Andrew's church arrived and put a stop to the smoking while he administered the rites of the church.

"WILCOX GLIDE" HAS ARRIVED

New Dance to Supplant Turkey Trot Is Invented.

A new dance, the Ella Wheeler Wilcox glide, was introduced recently in Earl hall, Columbia university, New York, at a reception given by the Western club of the college, under the auspices of the university forum.

Mrs. Wilcox herself consented to dance the newly invented steps, with Louis F. Chalfi, formerly of the Metropolitan Opera company, as her partner. The dance is a sort of combination of the valseienne and the minuet and is intended to supplant dances such as the turkey trot, which have come under ban.

Miss Jane Beers is the inventor of the Wilcox glide.

WOMAN FAILS TO FIND GOLD ON COCOS ISLAND.

Treasure Hunting Expedition Comes Back After Fine Time.

The treasure hunting expedition led by Miss Genevieve Davis, an English woman, which had been looking for buried gold on Cocos island for many months, got back to the city of Panama recently. A good time was had by all. No treasure was recovered.

Benito Bonito was a regular pirate, who in the early part of the nineteenth century settled down to "singeing the beard of the king of Spain" along the coast of Mexico. When he got any money together he buried it on Cocos island after the manner of pirates and made a map with the skull and crossbones marking the spot where the treasure was hid. His heirs have made a substantial living selling these maps to those whom romance and the works of R. L. Stevenson have touched.

Miss Davis' expedition started out from Plymouth with one of the maps and a vessel armed with a six pounder to fight the natives of Cocos island, which lies 550 miles southwest of Panama, on Sept. 10 last. The only woman besides Miss Davis aboard the ship was her friend Mrs. Barry Till.

Two other expeditions left respectively from France and Victoria, B. C., with maps similar to that of Miss Davis. Nothing has been heard of them recently.

FIND GREAT IRON ORE TRACT.

Fabulous Wealth Located in Earth of Wisconsin.

What promises to be the greatest iron ore discovery in the world's history became known in Milwaukee recently with the arrival in that city of Frank R. Henzel of Prairie Du Chien to close arrangements for the transfer of leases on an enormous tract of land to a local representative of some of the biggest iron mining operators in the United States.

The great tract is in the southwestern part of Wisconsin, extends over parts of three counties, and the discoverers believe that an area sixty miles long and forty miles wide is largely underlaid with ore of rich percentage in metallic iron.

Assays range from 54 per cent to over 60 per cent metallic iron, most of it non-Bessemer, but with possibilities of developing Bessemer quality at a lower depth.

The ore is nearly the surface, being in places only twenty feet beneath, while in the best explored tract the mineral is eighty feet below the surface and has been tested through a depth of forty feet. One area tested out contains approximately 2,000,000 tons of ore, valued at about \$8,000,000.

Indications of It.
